Indiana University Radiography Program
Program Effectiveness Data

June 2014 – May 2015

Publication of annual program effectiveness data is a condition of continued accreditation by the Joint Review Committee on Education in Radiologic Technology (JRCERT). The data required includes five-year average credentialing examination pass rate, five-year average job placement rate, and annual program completion rate.

American Registry of Radiologic Technologists (ARRT) Certification Examination in Radiography Pass Rate – 2011 through 2015

94% (159 of 169) of program graduates passed the ARRT Certification Examination in Radiography on the first attempt. The JRCERT standard for this effectiveness measure is 75% pass rate on the first attempt, within six months of graduation.

Job Placement Rate – 2011 through 2015

93.4% (85 of 91) of students graduating in the past 5 years and actively seeking employment were employed within 12 months of graduation. Not counted are graduates who are continuing their education, those not actively seeking employment, or those not responding to the survey. The JRCERT standard for job placement rate is a five-year average of 75% within 12 months of graduation.

Annual Program Completion Rate

94.6% (35 of 37) of students in the cohort graduating in May 2015 completed the program.
